*Bold*-Peter H. Diamandis 2016-02-23

Bold is a radical how-to guide for using exponential technologies, moonshot thinking, and crowd-powered tools to create extraordinary wealth while also positively impacting the lives of billions. A follow-up to the authors' Abundance (2012).

**Abundance**-Peter H. Diamandis 2014-09-23

The authors document how four forces--exponential technologies, the DIY innovator, the Technophilanthropist, and the Rising Billion--are conspiring to solve our biggest problems. "Abundance" establishes hard targets for change and lays out a strategic roadmap for governments, industry and entrepreneurs, giving us plenty of reason for optimism.

**The Future Is Faster Than You Think**-Peter H. Diamandis 2020-01-28

From the New York Times bestselling authors of Abundance and Bold comes a practical playbook for technological convergence in our modern era. In their book Abundance, bestselling authors and futurists Peter Diamandis and Steven Kotler tackled grand global challenges, such as poverty, hunger, and energy. Then, in Bold, they chronicled the use of exponential technologies that allowed the emergence of powerful new entrepreneurs. Now the bestselling authors are back with The Future Is Faster Than You Think, a blueprint for how our world will change in response to the next ten years of rapid technological disruption. Technology is accelerating far more quickly than anyone could have imagined. During the next decade, we will experience more upheaval and create more wealth than we have in the past hundred years. In this gripping and insightful roadmap to our near future, Diamandis and Kotler investigate how wave after wave of exponentially accelerating technologies will impact both our daily lives and society as a whole. What happens as AI, robotics, virtual reality, digital biology, and sensors crash into 3D printing, blockchain, and global gigabit networks? How will these convergences transform today's legacy industries? What will happen to the way we raise our kids, govern our nations, and care for our planet? Diamandis, a space-entrepreneur-turned-innovation-pioneer, and Kotler, bestselling author and peak performance expert, probe the science of technological convergence and how it will reinvent every part of our lives--transportation, retail, advertising, education, health, entertainment, food, and finance--taking humanity into uncharted territories and reimagining the world as we know it. As indispensable as it is gripping, The Future Is Faster Than You Think provides a prescient look at our impending future.

**How to Make a Spaceship**-Julian Guthrie 2016-09-20

A New York Times bestseller! The historic race that reawakened the promise of manned spaceflight A Finalist for the PEN/E. O. Wilson Literary Science Writing Award Alone in a Spartan black cockpit, test pilot Mike Melvill rocketed toward space. He had eighty seconds to exceed the speed of sound and begin the climb to a target no civilian pilot had ever reached. He might not make it back alive. If he did, he would make history as the world's first commercial astronaut. The spectacle defied reason, the result of a competition dreamed up by entrepreneur Peter Diamandis, whose vision for a new race to space required small teams to do what only the world's largest governments had done before. Peter Diamandis was the son of hardworking immigrants who wanted their science prodigy to make the family proud and become a doctor. But from the age of eight, when he watched Apollo 11 land on the Moon, his singular goal was to get to space. When he realized NASA was winding down manned space flight, Diamandis set out on one of the great entrepreneurial adventure stories of our time. If the government wouldn't send him to space, he would create a private space flight industry himself. In the 1990s, this idea was the stuff of science fiction. Undaunted, Diamandis found inspiration in an unlikely place: the golden age of aviation. He discovered that Charles Lindbergh made his transatlantic flight to win a \$25,000 prize. The flight made Lindbergh the most famous man on earth and galvanized the airline industry. Why, Diamandis thought, couldn't the same be done for space flight? The story of the bullet-shaped SpaceShipOne, and the other teams in the hunt, is an extraordinary tale of making the impossible possible. It is driven by outsized characters--Burt Rutan, Richard Branson, John Carmack, Paul Allen--and obsessive pursuits. In the end, as Diamandis dreamed, the result wasn't just a victory for one team; it was the foundation for a new industry and a new age.

*Thought Economics*-Vikas Shah 2021-02-04

'Stimulating, intelligent and enjoyable discussions of the most important issues of our day.' STEVEN PINKER 'From entrepreneurs to athletes, and world leaders to entertainers, this is a fascinating collection of interviews with some of the world's most influential individuals.' MARK CUBAN 'Thought Economics is a fine rebuke to the soundbite culture; these interviews are driven by real curiosity, and there is a wealth of wisdom here.' EDWARD STOURTON Since 2007, entrepreneur and philanthropist Vikas Shah has been on a mission to interview the people shaping our century. Including conversations with Nobel prizewinners, business leaders, politicians, artists and Olympians, he has been in the privileged position of questioning the minds that matter on the big issues that concern us all. We often talk of war and conflict, the economy, culture, technology and revolutions as if they are something other than us. But all these things are a product of us - of our ideas, our dreams and our fears. We live in fast-moving and extraordinary times, and the changes we're experiencing now, in these first decades of the twenty-first century, feel particularly poignant as decisions are made that will inform our existence for years to come. What started out as a personal interest in the mechanisms that inform our views of the world, and a passion for understanding, has grown into a phenomenal compilation of once-in-a-lifetime conversations. In this incredible collection, Shah shares some of his most emotive and insightful interviews to date. Chapters include: Chapter 1. On Identity: Who We Are Chapter 2. On Culture: The Context of Humanity Chapter 3. On Leadership: Bringing Humanity Together Chapter 4. On Entrepreneurship: The Creators and the Makers Chapter 5. *Exponential Organizations*-Salim Ismail 2014-10-14

Frost & Sullivan's 2014 Growth, Innovation, and Leadership Book of the Year "EXPONENTIAL ORGANIZATIONS should be required reading for anyone interested in the ways exponential technologies are reinventing best practices in business." —Ray Kurzweil, Director of Engineering at Google In business, performance is key. In performance, how you organize can be the key to growth. In the past five years, the business world has seen the birth of a new breed of company—the Exponential Organization—that has revolutionized how a company can accelerate its growth by using technology. An ExO can eliminate the incremental, linear way traditional companies get bigger, leveraging assets like community, big data, algorithms, and new technology into achieving performance benchmarks ten times better than its peers. Three luminaries of the business world—Salim Ismail, Yuri van Geest, and Mike Malone—have researched this phenomenon and documented ten characteristics of Exponential Organizations. Here, in EXPONENTIAL ORGANIZATIONS, they walk the reader through how any company, from a startup to a multi-national, can become an ExO, streamline its performance, and grow to the next level. "EXPONENTIAL ORGANIZATIONS is the most pivotal book in its class. Salim examines the future of organizations and offers readers his insights on the concept of Exponential Organizations, because he himself embodies the strategy, structure, culture, processes, and systems of this new breed of company." —John Hagel, The Center for the Edge Chosen by Benjamin Netanyahu, Prime Minister of Israel, to be one of Bloomberg's Best Books of 2015

*People Powered*-Jono Bacon 2019-11-12

Harness the power of communities, both inside and outside of your organization, to drive value and revenue, activate your employees' and customers' talents, and create a highly engaged, loyal customer base. What if you discovered a blueprint that could grow your brand's reputation and loyalty, dramatically reduce customer service issues, produce content and technology, and cement a powerful, lasting relationship between you and your customers? Communities have been a popular topic since the rise of the Internet and social media, but few companies have consistently harnessed their power, driven tangible value, and effectively measured their return on investment (ROI) like: Salesforce.com has seen tremendous results with their community network of over 2 million members advocating for, supporting, and integrating Salesforce.com products Star Citizen used Kickstarter to raise over \$150 million to build their new video game and a community of over 2 million players. Red Hat collaborated with their community to build industry-leading technology, which led to a \$34 billion acquisition by IBM Companies such as PayPal, Facebook, Bosch, Microsoft, CapitalOne, and Google, have also built communities inside their organizations, which have fostered innovation, broken down silos, and helped their organizations to operate more efficiently and collaboratively. People Powered helps C-suite leaders, founders, marketers, customer advocates, and community leaders gain a competitive advantage by answering the following questions: What is the key value proposition of building a community? What kind of community do we need and how do we build and integrate it into our organization? How do we incentivize and encourage people to get involved, build reliable growth, and keep community members engaged? How do we develop authentic, productive relationships with community members both online and in person? How do we get departmental buy-in, hire effectively, and create consistent, reliable community engagement skills in our organization? What are the strategic and tactical pitfalls and roadblocks we need to avoid? How do we make sure that our community continues to grow with us—and more importantly, how do we make sure that we continue to grow with them? People Powered pulls together over 20 years of pragmatic experience into a clear, simple methodology and blueprint to not just answer these questions, but deliver results. It also includes contributions from industry leaders including Joseph Gordon-Levitt (Emmy-award winning actor), Peter H. Diamandis (Founder of XPRIZE, Singularity University), Jim Zemlin (Executive Director, The Linux Foundation), Mike Shinoda (Co-Founder, Linkin Park), Jim Whitehurst (CEO, Red Hat), and more. Don't get left behind—become an industry trailblazer and ensure your company's longevity by tapping into the most dynamic force both outside and inside your organization: the people.

**A Small Furry Hope**-Steven Kotler 2010-11-01

Steven Kotler was forty years old, single, and facing an existential crisis when he met Lila, a woman devoted to animal rescue. "Love me, love my dogs," was her rule, and Steven took it to heart. Spurred to move by a housing crisis in Los Angeles, Steven, Lila - and their eight dogs, then ten, then twenty, and then they lost count - bought a postage-stamp-sized farm in Chimayo, New Mexico. A Small Furry

Hope chronicles their adventures at Rancho de Chihuahua, the sanctuary they created for their pack with special needs: the very old, the very sick, and, as Kotler says, "the really retarded." An insider look at the culture of dog rescue, A Small Furry Prayer weaves personal experience, and scientific inquiry into a fast-paced, fun-filled narrative that explores what it means to devote one's life to the furry and the four-legged. Along the way, Kotler combs through every aspect of canine-human relations, from long human history with dogs to brand new research into the neuroscience of canine companionship, in the end discovering why living in a world made of dog may be the best way to uncover the truth about what it really means to be human.

**West of Jesus**-Steven Kotler 2008-12-01

After spending two years in bed with Lyme disease, Steven Kotler had lost everything: his health, his job, his girl, and, he was beginning to suspect, his mind. Kotler, not a religious man, suddenly found himself drawn to the sport of surfing as if it were the cornerstone of a new faith. Why, he wondered, when there was nothing left to believe in, could he begin to believe in something as unlikely as surfing? What was belief anyway? How did it work in the body, the brain, our culture, and human history? With the help of everyone from rebel surfers to rocket scientists, Kotler undertakes a three-year globetrotting quest. The results are a startling mix of big waves and bigger ideas: a surfer's journey into the biological underpinnings of belief itself.

**Unreasonable Success and How to Achieve It**-Richard Koch 2020-08-13

How do people of seemingly ordinary talent go on to achieve unexpected results? What can we learn from them? What are the ingredients for unreasonable success and how is it achieved? In this groundbreaking book, bestselling author Richard Koch charts a map of success, identifying the nine key attitudes and strategies can propel anyone to new heights of accomplishment. The pattern of success is fractal. It is endlessly varied but endlessly similar. Success does not require genius, consistency, all-round ability, a safe pair of hands or even basic competence. If it did, most of the people in this book would not have impacted the world as they did. Who could have predicted that Nelson Mandela, a once-obscure lawyer, could have averted disaster in South Africa, reconciling people of different heritages to each other and establishing a viable democracy? Or that Helena Rubinstein, a young woman growing up in the grotty ghetto of Kraków, could have changed the face of beauty throughout the world? Or that the illegitimate son of a notary would become one of the world's greatest painters, known universally by his first name, Leonardo? Successful people typically don't plan their success. Instead they develop a unique philosophy or attitude that works for them. They stumble across strategies which are shortcuts to success, and latch onto them. Events hand them opportunities they could not have anticipated. Often their peers with equal or greater talent fail while they succeed. It is too easy to attribute success to inherent, unstoppable genius. With this book, you can embark on a journey towards a new, unreasonably successful future.

**Stealth**-Peter Westwick 2020

The story behind the technology that revolutionized both aeronautics, and the course of history.On a moonless night in January 1991, a dozen airplanes appeared in the skies over Baghdad. Or, rather, didn't appear. They arrived in the dark, their black outlines cloaking them from sight. More importantly, their odd, angular shapes, which made them look like flying origami, rendered them undetectable to Iraq's formidable air defenses. Stealth technology, developed during the decades before Desert Storm, had arrived. To American planners and strategists at the outset of the Cold War, this seemingly ultimate way to gain ascendance over the USSR was only a question. What if the United States could defend its airspace while at the same time send a plane through Soviet skies undetected? A craft with such capacity would have to be essentially invisible to radar - an apparently miraculous feat of physics and engineering. In *Stealth*, Peter Westwick unveils the process by which the impossible was achieved.At heart, *Stealth* is a tale of two aerospace companies, Lockheed and Northrop, and their fierce competition - with each other and with themselves - to obtain what was estimated one of the largest procurement contracts in history. Westwick's book fully explores the individual and collective ingenuity and determination required to make these planes and in the process provides a fresh view of the period leading up to the end of the Soviet Union. Taking into account the

role of technology, as well as the art and science of physics and engineering, Westwick offers an engaging narrative, one that immerses readers in the race to produce a weapon that some thought might save the world, and which certainly changed it.

The DNA of business has changed. Forever. You can blame technology, smartphones, social media, online shopping and everything else, but nothing changes this reality: we are in a moment of business purgatory. So, what are you going to do about it? Mitch Joel, one of the world's leading experts in new media, warns that the time has come to CTRL ALT DELETE. To reboot and to start re-building your business model. If you don't, Joel warns, not only will your company begin to slide backwards, but you may find yourself unemployable within five years. That's a very strong warning, but in his new book, CTRL ALT DELETE, Joel explains the convergence of five key movements that have changed business forever. The movements have already taken place, but few businesses have acted on them. He outlines what you need to know to adapt right now. He also points to the seven triggers that will help you take advantage of these game-changing factors to keep you employable as this new world of business unfolds. Along the way, Joel introduces his novel concept of "squiggle" which explains how you can learn to adapt your personal approach to your career, as new technology becomes the norm. In short, this is not a book about "change management" but rather a book about "changing both you AND your business model."

*Stealing Fire*-Steven Kotler 2017-02-21

NATIONAL BESTSELLER CNBC and Strategy + Business Best Business Book of 2017 “A mind-blowing tour along the path from sex and drugs to R&D.” - Financial Times It’s the biggest revolution you’ve never heard of, and it’s hiding in plain sight. Over the past decade, Silicon Valley executives like Eric

Schmidt and Elon Musk, Special Operators like the Navy SEALs and the Green Berets, and maverick scientists like Sasha Shulgin and Amy Cuddy have turned everything we thought we knew about high performance upside down. Instead of grit, better habits, or 10,000 hours, these trailblazers have found a surprising short cut. They're harnessing rare and controversial states of consciousness to solve critical challenges and outperform the competition. New York Times bestselling author Steven Kotler and high performance expert Jamie Wheal spent four years investigating the leading edges of this revolution—from the home of SEAL Team Six to the Googleplex, the Burning Man festival, Richard Branson’s Necker Island, Red Bull’s training center, Nike’s innovation team, and the United Nations’ Headquarters. And what they learned was stunning: In their own ways, with differing languages, techniques, and applications, every one of these groups has been quietly seeking the same thing: the boost in information and inspiration that altered states provide. Today, this revolution is spreading to the mainstream, fueling a trillion dollar underground economy and forcing us to rethink how we can all lead richer, more productive, more satisfying lives. Driven by four accelerating forces—psychology, neurobiology, technology and pharmacology—we are gaining access to and insights about some of the most contested and misunderstood terrain in history. Stealing Fire is a provocative examination of what’s actually possible; a guidebook for anyone who wants to radically upgrade their life.

Despite the instrumental role they played in building some of the foremost companies of our time, these women have been written out of history - until now. In Alpha Girls, award-winning writer Julian Guthrie reveals their untold stories. \*Magdalena Yesil who arrived in America from Turkey with \$43 to her name and would go on to help Marc Benioff build Salesforce. \*Mary Jane Elmore - one of the first women in the United States to make partner at a venture capital firm. \*Theresia Gouw, who helped land and build companies including Facebook, Trulia, Imperva and ForeScout. \*Sonja Hoel, the first woman investing partner at Menlo Ventures who invested in McAfee, Hotmail, Acme Packet and F5 Networks as well as founding an all-women's investment group and a national nonprofit for girls. *Big Little Breakthroughs*-Josh Linkner 2021-04-20

The pressure to generate big ideas can feel overwhelming. We know that bold innovations are critical in these disruptive and competitive times, but when it comes to breakthrough thinking, we often freeze up. Instead of shooting for a \$10-billion payday or a Nobel Prize, the most prolific innovators focus on Big Little Breakthroughs—small creative acts that unlock massive rewards over time. By cultivating daily micro-innovations, individuals and organizations are better equipped to tackle tough challenges and seize transformational opportunities. How did a convicted drug dealer launch and scale a massively successful fitness company? What core mindset drove LEGO to become the largest toy company in the world? How did a Pakistani couple challenge the global athletic shoe industry? What simple habits led Lady Gaga, Banksy, and Lin-Manuel Miranda to their remarkable success? Big Little Breakthroughs isn’t just for propeller-head inventors, fancy-pants CEOs, or hoodie-donning tech billionaires. Rather, it’s a surpassingly simple system to help everyday people become everyday innovators.

*The Big Nine*-Amy Webb 2019-03-05

A call-to-arms about the broken nature of artificial intelligence, and the powerful corporations that are turning the human-machine relationship on its head. We like to think that we are in control of the future of "artificial" intelligence. The reality, though, is that we -- the everyday people whose data powers AI -- aren't actually in control of anything. When, for example, we speak with Alexa, we contribute that data to a system we can't see and have no input into -- one largely free from regulation or oversight. The big nine corporations -- Amazon, Google, Facebook, Tencent, Baidu, Alibaba, Microsoft, IBM and Apple--are the new gods of AI and are short-changing our futures to reap immediate financial gain. In this book, Amy Webb reveals the pervasive, invisible ways in which the foundations of AI -- the people working on the system, their motivations, the technology itself -- is broken. Within our lifetimes, AI will, by design, begin to behave unpredictably, thinking and acting in ways which defy human logic. The big nine corporations may be inadvertently building and enabling vast arrays of intelligent systems that don't share our motivations, desires, or hopes for the future of humanity. Much more than a passionate, human-centered call-to-arms, this book delivers a strategy for changing course, and provides a path for liberating us from algorithmic decision-makers and powerful corporations.
